

Microbial Matrix Systems

ALFALFA HAY BIOLOGICAL PROGRAM

Microbial Matrix Systems is a company that works with growers of all types of agricultural crops to increase soil and plant health by improving the soil biology of the field.

What is “the Program” for ALFALFA - Oregon

Spring	post-dormancy	Feb/March	Waste Away	2 qt/acre
	Pre-1 st cutting	May	Soil Inoculant	2 qt/acre
Summer	Between 1 st & 2 nd cutting		Soil Inoculant	2 qt/acre
Fall	After final cutting		Waste Away	2 qt/acre

Cost: The above Program has a total product cost of \$63/acre.

What is “the Program” for ALFALFA - California

Spring		with Herbicide Application	Soil Inoculant	2 qt/acre
After every cutting		Through pivot or sprayer	15-5-5BioSoilenhacer	2 qt/acre

WHY does this MMS Program work?

- The addition of microbes at the right times will enable the plants to make better use of whatever nutrients are available in the soil, and they will do this at the times the plants need this uptake of nutrients.
- In addition, the products work to improve the soil aeration, drainage and overall soil structure. Healthier soil makes healthier plants and quality yields.
