Trial in field in Tipton, CA used for dairy lagoon discharge

Constant application of lagoon water made soil tight with poor root and water penetration. Soils high in salts and nutrients. Nutrients not available due to tight soil.

Control

Treated, Waste Away 1 gal/acre. 0.25lb more root mass

High Calcareous Low OM Soil amended with compost

Treated with Waste Away® 2 qt per acre made nutrients from compost and fertilizer more available in tight calcareous soil.
